globalgig

Get the Right Wireline Connectivity Without More Providers to Manage

T-MOBILE FOR BUSINESS PARTNER PROGRAM

As businesses add sites, refresh circuits or adapt their network architectures, connectivity requirements can vary significantly from one location to the next.

Through Globalgig, T-Mobile customers can access the wireline connectivity and managed services needed to support each site, with Globalgig coordinating design, deployment and ongoing support.

Managed wireline connectivity across the U.S. and 200+ countries

97% on-time installation

One consolidated circuit bill and support team

Simplify Wireline Connectivity Across Your Network

Broadband
Reliable, cost-effective connectivity for everyday business needs.

DIA
High-performance dedicated internet access.

Point-to-Point
Secure, dedicated connectivity between sites.

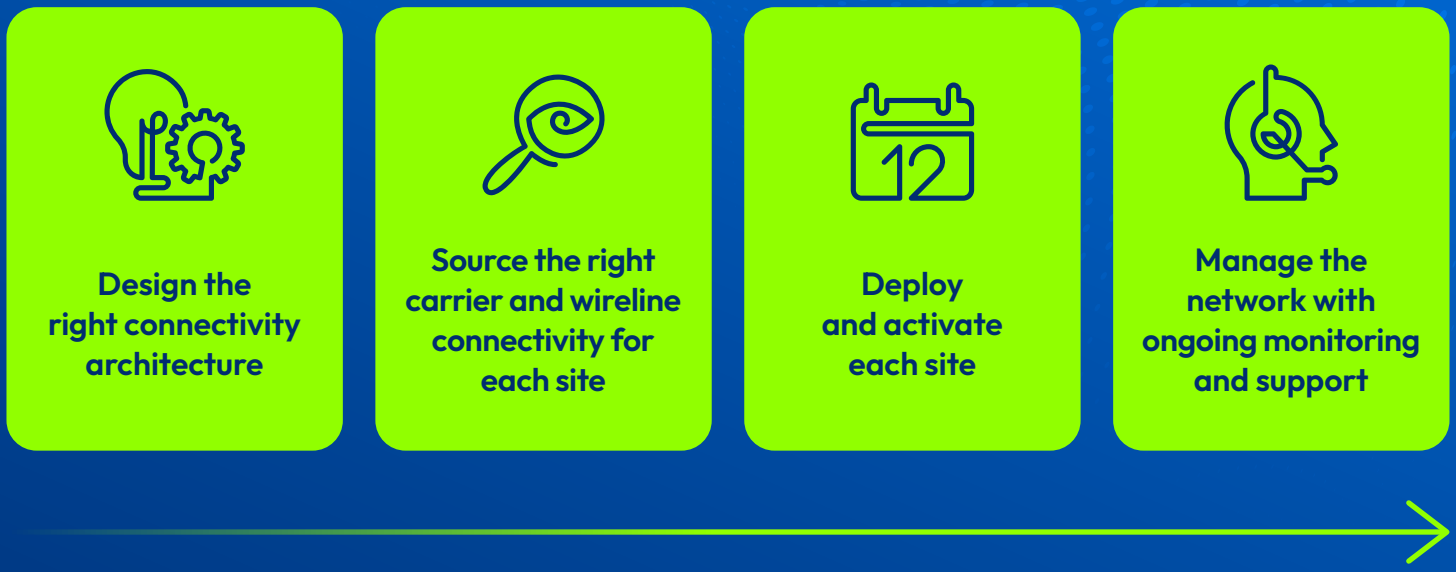
Wave
High-capacity transport for your critical locations.

MPLS
Reliable, private connectivity for multi-site networks.

Support Different Site Needs With Managed Wireline	**Access traditional broadband, dedicated internet access (DIA), private point-to-point, wave and MPLS** services alongside your T-Mobile wireless connectivity.
Roll Out Connectivity Across the U.S. and Beyond	Connect sites across the U.S. and in **200+ countries**, with Globalgig coordinating local carriers, deployment and ongoing support.
Deploy New Sites With Less Internal Effort	Simplify single-site and multi-site deployments, with Globalgig coordinating the process from circuit delivery through activation. Site readiness, equipment installation, configuration and testing are managed as part of one coordinated deployment, backed by an **average 97% on-time installation rate.**
Bring Multiple Providers Under One Team	Bring multiple providers and circuits together under **one team,** with **one consolidated circuit bill** and a consistent approach to support and management.
Gain Site-Level Visibility Across Your Network	Globalgig's **Orchestra Insight** provides a site-level view of circuit **availability, health and risk,** helping teams identify potential issues earlier and take action before they cause disruption.

Built Around Your Environment and How You Operate

We manage the full wireline connectivity life cycle, so you get the right solution in the right place, with the right support to operate it.



Architected Around Each Site's Needs
Connectivity is designed around performance, resilience, availability, bandwidth and application requirements so each site gets the right solution for how it operates.

Designed Around the Environment You Already Have
Globalgig works across mixed technologies, vendors and life-cycle stages, integrating new connectivity into your existing SD-WAN, SASE and security architecture rather than forcing unnecessary replacement or redesign.

Commercial Flexibility That Fits Your Network Strategy
Choose from 12-, 24- or 36-month terms with your T-Mobile agreement.

Specialist Network Expertise Without Adding Headcount
Flexible managed service options range from 24/7 monitoring, day-to-day support and specialist engineering expertise to fully managed network services.

T-MOBILE FOR BUSINESS PARTNER PROGRAM

What Does Your Network Need Next?

Whether you are opening a new site, replacing an existing circuit or trying to simplify a multi-carrier environment, Globalgig and T-Mobile can help assess the requirements and recommend the right approach.
